Green Screen **33** †

† Chromablue and Chromagreen (1.35m and 2.72m width) and Green Screen (1.72m and 3.55m width) are special shades in the Colorama range, manufactured to achieve a colour as close as possible to Chromakey colours, within the limitations of paper manufacture.

†† Granite is suitable for use when 18% grey is required.

* Colours available in 2.72 x 25m (107" x 82ft).

Although every effort is made to ensure consistency of product, the paper production process may cause slight variations in colour. The texture and lighting of the surface can influence the final appearance of the colour.

The core size on 1.35m (53") and 2.72m (9ft) wide rolls is 5.4cm (2 ⅛").

Colorama coloured papers are made from 90% recycled paper products. All other raw material is sourced from managed renewable sources.
