

DESCRIPTION

This fixer is for processing color negative C41-RA films at 38°C. The package contains 2 doses of 5L that make 20 litres of product each. Once prepared, the product can be used both as a replenisher and as a tank solution.

SAFETY INSTRUCTIONS

For detailed safety and handling instructions refer to MSDS or contact BELLINI FOTO S.r.l. by e-mail: info@bellinifoto.it or by telephone +39 075 985 174. Handle with care and follow safety and handling instructions. Wear gloves and use safety goggles; keep out of reach of children.

SPECIFICATIONS

Temperature (°C)	38° ± 0.3
Time (sec)	90 sec
Replenisher	33 ml / 135 film of 24 exposures

pH VALUES and Sp. Gr.

	pH 27°C	Sp.Gr. 27°C
Fresh Tank Solution	7.95 ± 0.10	1.085 ± 0.010
Replenisher	7.95 ± 0.10	1.085 ± 0.010
Seasoned Tank Solution	NA	NA

MIXING INSTRUCTIONS

to make	Water	Concentrate
10L	7.5L	2.5L
20L	15L	5L
40L	30L	10L

The previous version of this product (TN20FRA) made 20L of Fixer Replenisher with two 5L canisters. This new version (TN40FRA) makes 40L with the same amount of concentrate, reducing packaging, weight and transport costs.
