

BLITZ V2

The Ultimate Processor Cleaner

Foams - Clings - Cleans

**Deep Cleans, Descales
& Refurbishes
All in one easy Application**

New Blitz V2 With Rapid Foaming Action !

Rapidly Foams away All traces of even heavily oxidised developer, chemical scale & stains from all Racks, Rollers, Tanks and other components within your processor. Removes all contaminations from all makes and models of processors & mini labs.

NB. Blitz V2 will not remove hard sulphur or silver build up. Ask Hydra sales for advice.

Non Misting-Non Atomising !

New, easy to use **Blitz V2**, coats the racks with a fast acting penetrating soft foam.

Hydra's new foaming technology, removes the unpleasant misting or atomising normally associated with other cleaning products, however as the chemical scale itself has an odour, we recommend good ventilation as this odour will be released during the cleaning process.

Fast Acting! Brightens Metal!

Blitz Z V2 starts to work on application, dissolving away heavy chemical scale, mineral scale, old algae scale & oxidised tar contamination on racks & rollers. Blitz contains phosphoric acid which brightens stainless steel surfaces.

One part, Safe Cleaner

Unlike other cleaning products **Blitz V2** does not contain heavy metals and eliminates the need for a 2 part system cleaner. **Blitz V2** does not require neutralising after use and is safe to go straight to drain.

NB. For total processor in- situ cleaning use **Blitz V2** in 5L containers to make up a soak tank solution. This cleaning process de-scales pipe-work, re-circulation pumps and tanks together with the racks.
